VT Opportunity Fund Summary

Investment Objective

The VT Opportunity Fund seeks long-term capital appreciation.

Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy and hold shares of the Fund. These tables do not reflect the charges that may be imposed in connection with variable life insurance policies (VLI Policies) or variable annuity contracts (VA Contracts) through which you hold Fund shares.

Shareholder Fees (fees paid directly from your investments)	
Maximum sales charge (load) imposed on purchases	None
Maximum deferred sales charge (load)	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.75%
Distribution (12b-1) Fees	0.25%
Other Expenses	0.32%
Acquired Fund Fees and Expenses (Underlying Master Portfolios)	0.02%
Total Annual Fund Operating Expenses¹	1.34%
Fee Waivers	0.25%
Total Annual Fund Operating Expenses After Fee Waiver²	1.09%

¹ Expenses have been adjusted from amounts incurred during the Fund's most recent fiscal year to reflect current fees and expenses.

² The adviser has contractually committed through April 30, 2011, to waive fees and/or reimburse expenses to the extent necessary to ensure that the Fund's net operating expenses, including the underlying master portfolio's fees and expenses, and excluding brokerage commissions, interest, taxes and extraordinary expenses, do not exceed the net operating expense ratio shown. The committed net operating expense ratio may be increased or terminated only with approval of the Board of Trustees.

Example of Expenses

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. It assumes that you invest \$10,000 in the Fund for the time periods indicated below and then either redeem all of your shares at the end of these periods or continue to hold them; your investment has a 5% return each year; and the Fund's operating expenses remain the same.

	1 Year	3 Years	5 Years	10 Years
	\$111	\$400	\$710	\$1,591

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 50% of the average value of its portfolio.

Principal Investment Strategies

We invest principally in equity securities of medium-capitalization companies, which we define as those within the range of market capitalizations of companies in the Russell Midcap[®] Index. The range of the Russell Midcap[®] Index was \$829 million to \$12.2 billion as of May 30, 2009, and is expected to change frequently. Furthermore, we may use futures, options, repurchase or reverse repurchase agreements or swap agreements, as well as other derivatives, to manage risk or to enhance return. We reserve the right to hedge the portfolio's foreign currency exposure by purchasing or selling currency futures and foreign currency forward contracts. However, under normal circumstances, we will not engage in extensive foreign currency hedging.

We invest in equity securities of medium-capitalization companies that we believe are underpriced yet have attractive growth prospects. Our analysis is based on the determination of a company's "private market value," which is the price an investor would be willing to pay for the entire company. We determine a company's private market value based upon several types of analysis. We carry out a fundamental analysis of a company's cash flows, asset valuations, competitive situation and industry specific factors. We also gauge the company's management strength, financial health, and growth potential in determining a company's private market value. We place an emphasis on a company's management, even meeting with management in certain situations. Finally, we focus on the long-term strategic direction of a company. We then compare the private market

value as determined by these factors to the company's public market capitalization, and invest in the equity securities of those companies where we believe there is a significant gap between the two.

We may sell an investment when its market price no longer compares favorably with the company's private market value. In addition, we may choose to sell an investment where the fundamentals deteriorate or the strategy of the management or the management itself changes.

Principal Investment Risks

Counter-Party Risk. A Fund may incur a loss if the other party to an investment contract, such as a derivative or a repurchase or reverse repurchase agreement, fails to fulfill its contractual obligation to the Fund.

Currency Hedging Risk. An investment transacted in a foreign currency may lose value due to fluctuations in the rate of exchange.

Derivatives Risk. The use of derivatives such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than offset risk.

Foreign Investment Risk. Foreign investments face the potential of heightened illiquidity, greater price volatility and adverse effects of political, regulatory, tax, currency, economic or other macroeconomic developments.

Issuer Risk. The value of a security may decline because of adverse events or circumstances that directly relate to conditions at the issuer or any entity providing it credit or liquidity support.

Leverage Risk. Leverage created by borrowing or investments, such as derivatives and reverse repurchase agreements, can diminish the Fund's performance and increase the volatility of the Fund's net asset value.

Liquidity Risk. A security may not be able to be sold at the time desired without adversely affecting the price.

Management Risk. There is no guarantee of the Fund's performance or that the Fund will meet its objective. The market value of your investment may decline and you may suffer investment loss. An investment in the Fund is not a deposit of Wells Fargo Bank, N.A. or its affiliates and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Market Risk. The market price of securities owned by the Fund may rapidly or unpredictably decline due to factors affecting securities markets generally or particular industries.

Regulatory Risk. Changes in government regulations may adversely affect the value of a security.

Smaller Company Securities Risk. Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than larger company stocks.

Performance

The following information shows you how the Fund has performed and illustrates the variability of the Fund's returns over time. The Fund's average annual total returns are compared to the performance of an appropriate broad-based index (or indexes). Past performance is no guarantee of future results. Current month-end performance is available on the Fund's Web site at www.wellsfargo.com/advantagefunds.

The performance for the Fund does not reflect fees charged by variable life insurance policies (VLI Policies) or variable annuity contracts (VA Contracts). If it did, returns would be lower.

Best and Worst Quarter

Best Quarter: Q2 2009 23.22%
Worst Quarter: Q4 2008 -29.15%

The Fund's year-to-date performance through March 31, 2010, was 8.19%.

Average Annual Total Returns as of December 31, 2009	1 year	5 years	10 years
VT Opportunity Fund (incepted on May 8, 1992)	47.74%	2.70%	3.35%
Russell Midcap[®] Index	40.48%	2.43%	4.98%

Wells Capital Management Incorporated	Ann M. Miletti , Portfolio Manager / 2005

For important information about purchase and sale of fund shares, tax information, and financial intermediary compensation, please turn to “Summary of Other Important Information Regarding Purchase and Sale of Fund Shares” beginning on page 6 of the Prospectus.

Summary of Important Information Regarding Purchase and Sale of Fund Shares

Transaction Policies

Shares of Wells Fargo Variable Trust are not offered directly to the general public. The Trust currently offers its Fund shares to separate accounts of various life insurance companies as funding vehicles for certain VA Contracts and VLI Policies (variable contracts) issued through the separate accounts by such life insurance companies. Many of the separate accounts are registered as investment companies with the SEC. WFVT has entered into an agreement with the life insurance company sponsor of each separate account (a participation agreement) setting forth the terms and conditions pursuant to which the insurer will purchase and redeem shares of the Fund. Please refer to your VA Contract or VLI Policy prospectus for more information regarding the purchase and sale of your Fund shares.

For more information regarding Fund transactions, "Investing in the Funds" beginning on page 19 of the Prospectus, or contact your investment professional.

Tax Information

For federal income tax purposes, the Fund is treated as a separate entity. The Fund intends to qualify each year as a "regulated investment company" under the Internal Revenue Code. By so qualifying, the Fund expects to have little or no liability for federal income taxes by distributing substantially all of its net investment income and net realized capital gains to the separate accounts each year.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Fund through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Consult your salesperson or visit your financial intermediary's Web site for more information.

The information provided in this Prospectus is not intended for distribution to, or use by, any person or entity in any non-U.S. jurisdiction or country where such distribution or use would be contrary to law or regulation, or which would subject Fund shares to any registration requirement within such jurisdiction or country.

The Fund is distributed by Wells Fargo Funds Distributor, LLC, a member of FINRA/SIPC, and an affiliate of Wells Fargo & Company. Securities Investor Protection Corporation ("SIPC") information and brochure are available at www.SIPC.org or by calling SIPC at (202)371-8300.

Key Fund Information

This Prospectus contains information about a Fund within the *Wells Fargo Advantage Funds*® family and is designed to provide you with important information to help you with your investment decisions. Please read it carefully and keep it for future reference.

In this Prospectus, “we” generally refers to Wells Fargo Funds Management, LLC (Funds Management), the sub-adviser, or the portfolio manager. “We” may also refer to the Fund’s other service providers. “You” refers to the contract holder or potential investor.

Investment Objective, Principal Investments and Principal Investment Strategies

The investment objective of the Fund in this Prospectus is non-fundamental; that is, it can be changed by a vote of the Board of Trustees alone. The objective and strategies description for the Fund tells you:

- what the Fund is trying to achieve; and
- how we intend to invest your money.

This section also provides a summary of the Fund’s principal investments and practices. Unless otherwise indicated, these investment policies and practices apply on an ongoing basis.

Principal Risk Factors

This section lists the principal risk factors for the Fund. A complete description of these and other risks is found in the “Description of Principal Investment Risks” section. It is possible to lose money by investing in the Fund.

VT Opportunity Fund

Investment Adviser

Wells Fargo Funds
Management, LLC

Sub-Adviser

Wells Capital
Management Incorporated

Portfolio Manager

Ann M. Miletti

Fund Inception:

5/8/1992

Investment Objective

The VT Opportunity Fund seeks long-term capital appreciation.

Principal Investments

Under normal circumstances, we invest:

- at least 80% of the Fund's total assets in equity securities; and
 - up to 25% of the Fund's total assets in equity securities of foreign issuers, including ADRs and similar investments.
-

Principal Investment Strategies

We invest in principally equity securities of medium-capitalization companies, which we define as those within the range of market capitalizations of companies in the Russell Midcap® Index. The range of the Russell Midcap® Index was \$12.2 billion to \$829 million as of May 30, 2009, and is expected to change frequently. Furthermore, we may use futures, options, repurchase or reverse repurchase agreements or swap agreements, as well as other derivatives, to manage risk or to enhance return. We reserve the right to hedge the portfolio's foreign currency exposure by purchasing or selling currency futures and foreign currency forward contracts. However, under normal circumstances, we will not engage in extensive foreign currency hedging.

We invest in equity securities of medium-capitalization companies that we believe are under-priced yet have attractive growth prospects. Our analysis is based on the determination of a company's "private market value," which is the price an investor would be willing to pay for the entire company. We determine a company's private market value based upon several types of analysis. We carry out a fundamental analysis of a company's cash flows, asset valuations, competitive situation and industry specific factors. We also gauge the company's management strength, financial health, and growth potential in determining a company's private market value. We place an emphasis on a company's management, even meeting with management in certain situations. Finally, we focus on the long-term strategic direction of a company. We then compare the private market value as determined by these factors to the company's public market capitalization, and invest in the equity securities of those companies where we believe there is a significant gap between the two.

We may sell an investment when its market price no longer compares favorably with the company's private market value. In addition, we may choose to sell an investment where the fundamentals deteriorate or the strategy of the management or the management itself changes.

The Fund may hold some of its assets in cash or in money market instruments, including U.S. Government obligations, shares of other mutual funds and repurchase agreements, or make other short-term investments to either maintain liquidity or for short-term defensive purposes when we believe it is in the best interests of the shareholders to do so. During these periods, the Fund may not achieve its objective.

Principal Risk Factors

The Fund is primarily subject to the risks mentioned below.

- Counter-Party Risk
- Derivatives Risk
- Foreign Investment Risk
- Issuer Risk
- Leverage Risk
- Liquidity Risk
- Management Risk
- Market Risk
- Regulatory Risk
- Smaller Company Securities Risk

These and other risks could cause you to lose money in your investment in the Fund and could adversely affect the Fund's net asset value and total return. These risks are described in the "Description of Principal Investment Risks" section.

Description of Principal Investment Risks

Understanding the risks involved in mutual fund investing will help you make an informed decision that takes into account your risk tolerance and preferences. The factors that are most likely to have a material effect on a particular Fund as a whole are called "principal risks." The principal risks for the Fund have been previously identified and are described below. Additional information about the principal risks is included in the Statement of Additional Information.

Counter-Party Risk

When a Fund enters into a repurchase agreement, an agreement where it buys a security from a seller that agrees to repurchase the security at an agreed upon price and time, the Fund is exposed to the risk that the other party will not fulfill its contractual obligation. Similarly, the Fund is exposed to the same risk if it engages in a reverse repurchase agreement where a broker-dealer agrees to buy securities and the Fund agrees to repurchase them at a later date.

Currency Hedging Risk

An investment transacted in a foreign currency may lose value due to fluctuations in the rate of exchange. To manage currency exposure, a Fund may purchase currency futures or enter into forward currency contracts to "lock in" the U.S. dollar price of the security. A forward currency contract involves an agreement to purchase or sell a specified currency at a specified future price set at the time of the contract. Similar to a forward currency contract, currency futures contracts are standardized for the convenience of market participants and quoted on an exchange. To reduce the risk of one party to the contract defaulting, the accrued profit or loss from a futures contract is calculated and paid on a daily basis rather than on the maturity of the contract.

Derivatives Risk

The term "derivatives" covers a broad range of investments, including futures, options and swap agreements. In general, a derivative refers to any financial instrument whose value is derived, at least in part, from the price of another security or a specified index, asset or rate. For example, a swap agreement is a commitment to make or receive payments based on agreed upon terms, and whose value and payments are derived by changes in the value of an underlying financial instrument. The use of derivatives presents risks different from, and possibly greater than, the risks associated with investing directly in traditional securities. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the derivatives. These risks are heightened when the portfolio manager uses derivatives to enhance a Fund's return or as a substitute for a position or security, rather than solely to hedge (or offset) the risk of a position or security held by the Fund. The success of management's derivatives strategies will depend on its ability to assess and predict the impact of market or economic developments on the underlying asset, index or rate and the derivative itself, without the benefit of observing the performance of the derivative under all possible market conditions.

Foreign Investment Risk	Foreign investments, including American Depositary Receipts (ADRs) and similar investments, are subject to more risks than U.S. domestic investments. These additional risks may potentially include lower liquidity, greater price volatility and risks related to adverse political, regulatory, market or economic developments. Foreign companies also may be subject to significantly higher levels of taxation than U.S. companies, including potentially confiscatory levels of taxation, thereby reducing the earnings potential of such foreign companies. In addition, amounts realized on sales or distributions of foreign securities may be subject to high and potentially confiscatory levels of foreign taxation and withholding when compared to comparable transactions in U.S. securities. Investments in foreign securities involve exposure to fluctuations in foreign currency exchange rates. Such fluctuations may reduce the value of the investment. Foreign investments are also subject to risks including potentially higher withholding and other taxes, trade settlement, custodial, and other operational risks and less stringent investor protection and disclosure standards in certain foreign markets. In addition, foreign markets can and often do perform differently from U.S. markets.
Issuer Risk	The value of a security may decline for a number of reasons that directly relate to the issuer or an entity providing credit support or liquidity support, such as management performance, financial leverage, and reduced demand for the issuer's goods, services or securities.
Leverage Risk	Certain transactions may give rise to a form of leverage. Such transactions may include, among others, reverse repurchase agreements, loans of portfolio securities, and the use of when-issued, delayed delivery or forward commitment transactions. The use of derivatives may also create a leveraging risk. The use of leverage may cause a Fund to liquidate portfolio positions when it may not be advantageous to do so. Leveraging, including borrowing, may cause a Fund to be more volatile than if the Fund had not been leveraged. This is because leverage tends to increase a Fund's exposure to market risk, interest rate risk or other risks by, in effect, increasing assets available for investment.
Liquidity Risk	A security may not be sold at the time desired or without adversely affecting the price.
Management Risk	We cannot guarantee that a Fund will meet its investment objective. We do not guarantee the performance of a Fund, nor can we assure you that the market value of your investment will not decline. We will not "make good" on any investment loss you may suffer, nor does anyone we contract with to provide services, such as selling agents or investment advisers, promise to make good on any such losses.
Market Risk	The market price of securities owned by a Fund may go up or down, sometimes rapidly or unpredictably. Securities may decline in value or become illiquid due to factors affecting securities markets generally or particular industries represented in the securities markets. The value or liquidity of a security may decline or become illiquid due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They may also decline or become illiquid due to factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. During a general downturn in the securities markets, multiple asset classes may decline or become illiquid in value simultaneously.
Regulatory Risk	Changes in government regulations may adversely affect the value of a security. An insufficiently regulated market might also permit inappropriate practices that adversely affect an investment.

Smaller Company Securities Risk

Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than larger company stocks. Smaller companies may have no or relatively short operating histories, or be newly public companies. Some of these companies have aggressive capital structures, including high debt levels, or are involved in rapidly growing or changing industries and/or new technologies, which pose additional risks.

Portfolio Holdings Information

A description of the *Wells Fargo Advantage Funds*' policies and procedures with respect to disclosure of the *Wells Fargo Advantage Funds*' portfolio holdings is available in the Fund's Statement of Additional Information and on the *Wells Fargo Advantage Funds*' Web site at www.wellsfargo.com/advantagefunds. In addition, Funds Management will, from time to time, include portfolio holdings information in quarterly commentaries for certain Funds. The substance of the information contained in such commentaries will also be posted to the Funds' Web site at www.wellsfargo.com/advantagefunds.

Organization and Management of the Fund

About Wells Fargo Variable Trust

Wells Fargo Variable Trust (WFVT) was organized as a Delaware statutory trust on March 10, 1999. The Board of Trustees of WFVT (Board) supervises the Fund's activities, monitors its contractual arrangements with various service providers and decides upon matters of general policy. The Fund is available for purchase through certain VA Contracts and VLI Policies offered by the separate accounts of Participating Insurance Companies. Individual holders of VA Contracts and VLI Policies are not the "shareholders" of, or "investors" in, the Fund. Rather, the Participating Insurance Companies and their separate accounts are the shareholders or investors, although such companies will pass through voting rights to the holders of VA Contracts and VLI Policies. WFVT currently does not foresee any disadvantages to the holders of VA Contracts and VLI Policies arising from the fact that the interests of the holders of VA Contracts and VLI Policies may differ. Nevertheless, the Board monitors events in order to identify any conflicts which may arise and to determine what action, if any, should be taken in response to such conflicts. The VA Contracts and VLI Policies are described in the separate prospectuses issued by the Participating Insurance Companies. WFVT assumes no responsibility for such prospectuses.

The Investment Adviser

Wells Fargo Funds Management, LLC, located at 525 Market Street, San Francisco, CA 94105, serves as the investment adviser for the Fund. Funds Management, an indirect, wholly owned subsidiary of Wells Fargo & Company, was created to assume the mutual fund advisory responsibilities of Wells Fargo Bank and is an affiliate of Wells Fargo Bank. Wells Fargo Bank, which was founded in 1852, is the oldest bank in the western United States and is one of the largest banks in the United States. As adviser, Funds Management is responsible for implementing the investment policies and guidelines for the Fund and for supervising the sub-adviser who is responsible for the day-to-day portfolio management of the Fund. For providing these services, Funds Management is entitled to receive fees as described in the Fund's table of Annual Fund Operating Expenses under the caption "Management Fees." A discussion regarding the basis for the Board's approval of the investment advisory and sub-advisory agreements for the Fund is available in the Fund's annual report for the fiscal year ended December 31, 2009.

For the Fund's most recent fiscal year end, the advisory fee paid to Funds Management was as follows:

Advisory Fees Paid	As a % of average daily net assets
Fund Name	
VT Opportunity Fund	0.51%

Wells Fargo & Company is a diversified financial services company providing banking, insurance, investments, mortgage and consumer finance services. The involvement of various subsidiaries of Wells Fargo & Company, including Funds Management, in the management and operation of the Funds and in providing other services or managing other accounts gives rise to certain actual and potential conflicts of interest.

For example, certain investments may be appropriate for a Fund and also for other clients advised by Funds Management and its affiliates, and there may be market or regulatory limits on the amount of investment, which may cause competition for limited positions. Also, various client and proprietary accounts may at times take positions that are adverse to a Fund. Funds Management applies various policies to address these situations, but a Fund may nonetheless incur losses or underperformance during periods when Wells Fargo & Company, its affiliates and their clients achieve profits or outperformance.

Wells Fargo & Company may have interests in or provide services to portfolio companies or Fund shareholders or intermediaries that may not be fully aligned with the interests of all investors. Funds Management and its affiliates serve in multiple roles, including as investment adviser and, for most *Wells Fargo Advantage Funds*, sub-adviser, as well as administrator, principal underwriter, and securities lending agent.

These are all considerations of which an investor should be aware and which may cause conflicts that could disadvantage a Fund. Funds Management has instituted business and compliance policies, procedures and disclosures that are designed to identify, monitor and mitigate conflicts of interest.

The Sub-Adviser and Portfolio Manager

The following sub-adviser and portfolio manager perform day-to-day investment management activities for the Fund. The sub-adviser is compensated for its services by Funds Management from the fees Funds Management receives for its services as adviser to the Fund. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager and the portfolio manager's ownership of securities in the Fund.

Wells Capital Management Incorporated (Wells Capital Management), an affiliate of Funds Management, an indirect wholly owned subsidiary of Wells Fargo & Company, located at 525 Market Street, San Francisco, CA 94105, is the sub-adviser for the Fund. Accordingly, Wells Capital Management is responsible for the day-to-day investment management activities of the Fund. Wells Capital Management is a registered investment adviser that provides investment advisory services for registered mutual funds, company retirement plans, foundations, endowments, trust companies, and high net-worth individuals.

Ann M. Miletti
VT Opportunity Fund

As lead portfolio manager for the VT Opportunity Fund, Ms. Miletti is responsible for managing the VT Opportunity Fund, with principal responsibility for the day-to-day management and decision making for the Fund. She had previously jointly managed the VT Opportunity Fund, and its predecessor fund, as co-portfolio Manager with Richard T. Weiss from 2001 until 2008. Ms. Miletti joined Wells Capital Management in 2005 as a portfolio manager. Prior to joining Wells Capital Management, she was with Strong Capital Management, Inc. (SCM) since 1991. From August 1998 to September 2001, Ms. Miletti was an associate manager of equity accounts. Education: B.A., Education, University of Wisconsin.

Dormant Multi-Manager Arrangement

The Board has adopted a "multi-manager" arrangement for the Fund. Under this arrangement, the Fund and Funds Management may engage one or more sub-advisers to make day-to-day investment decisions for the Fund's assets. Funds Management would retain ultimate responsibility (subject to the oversight of the Board) for overseeing the sub-advisers and may, at times, recommend to the Board that the Fund: (1) change, add or terminate one or more sub-advisers; (2) continue to retain a sub-adviser even though the sub-adviser's ownership or corporate structure has changed; or (3) materially change a sub-advisory agreement with a sub-adviser.

Applicable law generally requires a Fund to obtain contract holder approval for most of these types of recommendations, even if the Board approves the proposed action. Under the "multi-manager" arrangement approved by the Board, the Fund will seek exemptive relief, if necessary, from the SEC to permit Funds Management (subject to the Board's oversight and approval) to make decisions about the Fund's sub-advisory arrangements without obtaining contract holder approval. The Fund will continue to submit matters to contract holders for their approval to the extent required by applicable law. Meanwhile, this multi-manager arrangement will remain dormant and will not be implemented until contract holders are further notified.

The Administrator

Funds Management provides the Fund with administrative services, including general supervision of the Fund's operation, coordination of the other services provided to the Fund, compilation of information for reports to the SEC and state securities commissions, preparation of proxy statements and shareholder reports, and general supervision of data compilation in connection with preparing periodic reports to WFVT's Trustees and officers. Funds Management also furnishes office space and certain facilities to conduct the Fund's business.

The Transfer Agent

Boston Financial Data Services, Inc. (BFDS) provides transfer agency and distribution disbursing services to the Fund.

Compensation to Dealers and Shareholder Servicing Agents

Additional Payments to Dealers

In addition to dealer realloances and payments made by the Fund for distribution and shareholder servicing, the Fund's adviser, the distributor or their affiliates make additional payments ("Additional Payments") to certain selling or shareholder servicing agents for the Fund, which include broker-dealers or other financial intermediaries. These Additional Payments are made in connection with the sale and distribution of shares of the Fund or for services to the Fund and its shareholders. These Additional Payments, which may be significant, are paid by the Fund's adviser, the distributor or their affiliates, out of their revenues, which generally come directly or indirectly from fees paid by the entire Fund complex.

In return for these Additional Payments, the Fund's adviser and distributor expect to receive certain marketing or servicing advantages that are not generally available to mutual funds that do not make such payments. Such advantages are expected to include, without limitation, placement of the Fund on a list of mutual funds offered as investment options to the selling agent's clients (sometimes referred to as "Shelf Space"); access to the selling agent's registered representatives; and/or ability to assist in training and educating the selling agent's registered representatives.

Certain selling or shareholder servicing agents receive these Additional Payments to supplement amounts payable by the Fund under the shareholder servicing plans. In exchange, these agents provide services including, but not limited to, establishing and maintaining accounts and records; answering inquiries regarding purchases, exchanges and redemptions; processing and verifying purchase, redemption and exchange transactions; furnishing account statements and confirmations of transactions; processing and mailing monthly statements, prospectuses, shareholder reports and other SEC-required communications; and providing the types of services that might typically be provided by the Fund's transfer agent (e.g., the maintenance of omnibus or omnibus-like accounts, the use of the National Securities Clearing Corporation for the transmission of transaction information and the transmission of shareholder mailings).

The Additional Payments may create potential conflicts of interests between an investor and a selling agent who is recommending a particular Fund over other mutual funds. Before investing, you should consult with your financial consultant and review carefully any disclosure by the selling agent as to what monies it may receive from mutual fund advisers and distributors, as well as how your financial consultant is compensated.

The Additional Payments are typically paid in fixed dollar amounts, or based on the number of customer accounts maintained by the selling or shareholder servicing agent, or based on a percentage of sales and/or assets under management, or a combination of the above. The Additional Payments are either up-front or ongoing or both. The Additional Payments differ among selling and shareholder servicing agents. Additional Payments to a selling agent that is compensated based on its customers' assets typically range between 0.05% and 0.30% in a given year of assets invested in the Fund by the selling agent's customers. Additional Payments to a selling agent that is compensated based on a percentage of sales typically range between 0.10% and 0.15% of the gross sales of the Fund attributable to the selling agent. In addition, representatives of the Fund's distributor visit selling agents on a regular basis to educate their registered representatives and to encourage the sale of Fund shares. The costs associated with such visits may be paid for by the Fund's adviser, distributor, or their affiliates, subject to applicable FINRA regulations.

More information on the FINRA member firms that have received the Additional Payments described in this section is available in the Statement of Additional Information, which is on file with the SEC and is also available on the *Wells Fargo Advantage Funds* website at www.wellsfargo.com/advantagefunds.

Distribution Plan

We have adopted a distribution plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act for the Fund. The Plan authorizes the payment of all or part of the cost of preparing and distributing prospectuses, annual and semi-annual reports, and other materials to prospective beneficial owners of the Fund's shares, and the payment of compensation to Participating Insurance Companies. For these services, each Fund pays an annual fee of 0.25% of its average daily net assets. These fees are paid out of the Fund's assets on an ongoing basis. Over time, these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

Pricing Fund Shares

The share price (net asset value per share or NAV) for the Fund is calculated each business day as of the close of trading on the New York Stock Exchange (NYSE) (generally 4 p.m. ET). To calculate the Fund's NAV, the Fund's assets are valued and totaled, liabilities are subtracted, and the balance, called net assets, is divided by the number of shares outstanding. The price at which a purchase or redemption of Fund shares is effected is based on the next calculation of NAV after the order is placed. The Fund does not calculate its NAV on days the NYSE is closed for trading, which include New Year's Day, Martin Luther King, Jr. Day, Washington's Birthday, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

With respect to any portion of the Fund's assets that may be invested in other mutual funds, the Fund's NAV is calculated based upon the net asset values of the other mutual funds in which the Fund invests, and the prospectuses for those companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

With respect to any portion of the Fund's assets invested directly in securities, the Fund's investments are generally valued at current market prices. Securities are generally valued based on the last sale price during the regular trading session if the security trades on an exchange (closing price). Securities that are not traded primarily on an exchange generally are valued using latest quoted bid prices obtained by an independent pricing service. Securities listed on the Nasdaq Stock Market, Inc., however, are valued at the Nasdaq Official Closing Price (NOCP), and if no NOCP is available, then at the last reported sales price.

We are required to depart from these general valuation methods and use fair value pricing methods to determine the values of certain investments if we believe that the closing price or the latest quoted bid price of a security, including securities that trade primarily on a foreign exchange, does not accurately reflect its current value when the Fund calculates its NAV. In addition, we use fair value pricing to determine the value of investments in securities and other assets, including illiquid securities, for which current market quotations are not readily available. The closing price or the latest quoted bid price of a security may not reflect its current value if, among other things, a significant event occurs after the closing price or latest quoted bid price but before the Fund calculates its NAV that materially affects the value of the security. We use various criteria, including a systematic evaluation of U.S. market moves after the close of foreign markets, in deciding whether a foreign security's market price is still reliable and, if not, what fair market value to assign to the security.

In light of the judgment involved in fair value decisions, there can be no assurance that a fair value assigned to a particular security is accurate or that it reflects the price that the Fund could obtain for such security if it were to sell the security as of the time of fair value pricing. Such fair value pricing may result in NAVs that are higher or lower than NAVs based on the closing price or latest quoted bid price. See the Statement of Additional Information for additional details regarding the pricing of Fund shares.

Investing in the Fund

Shares of WFVT are not offered directly to the general public. The Trust currently offers its Fund shares to separate accounts of various life insurance companies as funding vehicles for certain VA Contracts and VLI Policies (variable contracts) issued through the separate accounts by such life insurance companies. Many of the separate accounts are registered as investment companies with the SEC. When shares of WFVT are offered as a funding vehicle for variable contracts issued through such a separate account, a separate prospectus describing the separate account and the variable contracts being offered through it will accompany this prospectus. When WFVT offers Fund shares as funding vehicles for variable contracts issued through a separate account that is not registered as an investment company, a separate disclosure document (rather than a prospectus) describing the separate account and the variable contracts being offered through it will accompany this prospectus. In the future, WFVT may offer its Fund shares directly to qualified pension and retirement plans.

WFVT has entered into an agreement with the life insurance company sponsor of each separate account (a participation agreement) setting forth the terms and conditions pursuant to which the insurer will purchase and redeem shares of the Fund. In the event that WFVT offers shares of one or more Funds to a qualified pension or retirement plan, it likely will enter into a similar participation agreement. The discussion that follows reflects the terms of WFVT's current participation agreements (which do not differ materially from one another).

Shares of the Fund are sold in a continuous offering to the separate accounts to support the variable contracts. Net purchase payments under the variable contracts are placed in one or more sub-accounts of the separate accounts and the assets of each such sub-account are invested in the shares of the Fund corresponding to that sub-account. The separate accounts purchase and redeem shares of the Fund for their sub-accounts at each share's NAV without sales or redemption charges.

For each day on which a Fund's net asset value is calculated, the separate accounts transmit to WFVT any orders to purchase or redeem shares of the Fund based on the net purchase payments, redemption (surrender) requests, and transfer requests from variable contract owners that have been processed on that day. The separate account purchases and redeems shares of each Fund at the Fund's NAV per share calculated as of that day (*i.e.*, the day the separate account processes contract owner transactions), although such purchases and redemptions may be executed the next morning. Payment for shares redeemed is made within seven days after receipt of a proper redemption order, except that the right of redemption may be suspended or payments postponed when permitted by applicable laws and regulations.

Potential for Conflict of Interest

A potential for certain conflicts exists between the interests of variable annuity contract owners and variable life insurance contract owners, or between the interests of owners of variable contracts issued by different insurance companies or through different separate accounts. A potential for certain conflicts exists between the interests of variable contract owners and participants in a qualified pension or retirement plan that might invest in the Fund. To the extent that such classes of investors are invested in the same Fund when a conflict of interest arises that might involve the Fund, one or more such classes of investors could be disadvantaged. WFVT currently does not foresee any such disadvantage to owners of variable contracts. Nonetheless, the Board of Trustees of WFVT will monitor the Fund for the existence of any irreconcilable material conflicts of interest. If such a conflict affecting owners of variable contracts is determined to exist, then each life insurance company sponsoring a separate account investing the Fund will, to the extent reasonably practicable, take such action as is necessary to remedy the conflict or eliminate the conflict as it affects owners of variable contracts it has issued. If such a conflict were to occur in connection with a Fund, one or more insurance companies might be required to withdraw the investments of one or more of its separate accounts from the Fund or to substitute shares of another mutual fund (including another Fund) for those it holds of the Fund. This might force the Fund to sell portfolio securities at a disadvantageous price.

How Your Vote Would Count

With regard to Fund matters for which the 1940 Act requires a shareholder vote, insurance companies sponsoring a separate account holding shares of a Fund vote such shares in accordance with instructions received from owners of variable contracts (or annuitants or beneficiaries thereunder) having a voting interest in that separate account. Each share has one vote and votes are counted on an aggregate basis except as to matters where the interests of one Fund may differ from another (such as approval of an investment advisory agreement or a change in a Fund's fundamental policies). In such a case, the voting is on a Fund-by-Fund basis. Fractional shares are counted. Shares held by a separate account for which no instructions are received are voted by the insurance company sponsor of the account, for or against any propositions, or in abstention, in the same proportion as the shares for which instructions have been received. Due to proportional voting, the disposition of a particular proposition could be determined by a small number of contract owners.

Frequent Purchases and Redemptions of Fund Shares

Excessive trading by Fund shareholders can negatively impact the Fund and its long-term shareholders in several ways, including by disrupting Fund investment strategies, increasing transaction costs, decreasing tax efficiency and diluting the value of shares held by long-term shareholders. Excessive trading in Fund shares can negatively impact the Fund's long-term performance by requiring it to maintain more assets in cash or to liquidate portfolio holdings at a disadvantageous time. Certain Funds may be more susceptible than others to these negative effects. For example, Funds that have a greater percentage of their investments in non-U.S. securities may be more susceptible than other Funds to arbitrage opportunities resulting from pricing variations due to time zone differences across international financial markets. Similarly, Funds that have a greater percentage of their investments in small company securities may be more susceptible than other Funds to arbitrage opportunities due to the less liquid nature of small company securities. Both types of Funds also may incur higher transaction costs in liquidating portfolio holdings to meet excessive redemption levels. Fair value pricing may reduce these arbitrage opportunities, thereby reducing excessive trading risks. However, money market Funds, which are typically utilized by investors for cash management purposes and invest in highly liquid securities, are not as susceptible to these negative effects as non-money market Funds. Moreover, because all money market Funds typically maintain a \$1.00 net asset value (NAV), there is no significant financial incentive for an investor to attempt to market time investments into a money market Fund.

The Fund actively discourages and takes steps to prevent the portfolio disruption and negative effects on long-term shareholders that can result from excessive trading activity by Fund shareholders. The Board has approved the Fund's policies and procedures, which provide, among other things, that Funds Management may deem trading activity to be excessive if it determines that such trading activity would likely be disruptive to a Fund by increasing expenses or lowering returns. In this regard, Funds Management takes steps to avoid accommodating frequent purchases and redemptions of shares by contract owners. Funds Management monitors available contract owner trading information across all Funds on a daily basis. Funds Management will temporarily suspend the purchase and exchange privileges of a contract owner who completes a purchase and redemption in a Fund within 30 calendar days. Such contract owner will be precluded from investing in the Fund for a period of 30 calendar days.

Excessive trading may give rise to conflicts of interest between owners of different types of variable contracts and/or owners of variable contracts issued by different insurance companies that offer the Funds as investment options under their contracts.

An insurance company sponsor through whom variable contract owners may purchase shares of the Fund may independently attempt to identify excessive trading and take steps to deter such activity. As a result, an insurance company may on its own limit or permit trading activity of its variable contract owners that invest in Fund shares using standards different from the standards used by the Fund and discussed in this prospectus. The Fund may permit an insurance company to enforce its own internal policies and procedures concerning frequent trading in instances where the Fund reasonably believes that the company's policies and procedures effectively discourage disruptive trading activity. If a variable contract owner purchases Fund shares through an insurance company sponsor, it should contact the company for more information about whether and how restrictions or limitations on trading activity will be applied to the separate account.

Distributions

The Fund is treated separately in determining the amounts of distributions of any net investment income and realized net capital gains payable to its shareholders. A distribution is automatically reinvested on the payment date in additional Fund shares at NAV or paid in cash at the election of the Participating Insurance Company.

The Fund generally declares and makes distributions of any net investment income annually, and generally makes any realized net capital gains distributions at least annually.

Taxes

For federal income tax purposes, the Fund is treated as a separate entity. The Fund intends to qualify each year as a “regulated investment company” under the Internal Revenue Code, and will meet certain diversification requirements applicable to mutual funds underlying variable contracts. By so qualifying, the Fund expects to have little or no liability for federal income taxes by distributing substantially all of its net investment income and net realized capital gains to the separate accounts each year.

Since the separate accounts are the only shareholders of WFVT, no discussion is included herein as to the federal income tax consequences at the shareholder level. For information concerning the federal income tax consequences to purchasers of variable contracts, see the accompanying contract prospectus or disclosure document.

Additional Performance Information

This section contains additional information regarding performance of the Funds. The sub-section below titled “Index Descriptions” defines the market indices that are referenced in the Fund Summaries. The sub-section below titled “Share Class Performance” provides history for specified share classes of certain Funds.

Index Descriptions

The “Average Annual Total Returns” table in each Fund’s Fund Summary compares the Fund’s returns with those of at least one broad-based market index. Below are descriptions of each such index. You cannot invest directly in an index.

Russell Midcap[®] Index The Russell Midcap[®] Index measures the performance of the 800 smallest companies in the Russell 1000[®] Index, which represent approximately 25% of the total market capitalization of the Russell 1000[®] Index. You cannot invest directly in an index.

A Fund’s past performance is no guarantee of future results. A Fund’s investment results will fluctuate over time, and any representation of the Fund’s returns for any past period should not be considered as a representation of what a Fund’s returns may be in any future period. The Fund’s annual and semi-annual reports contain additional performance information and are available upon request, without charge, by calling the telephone number listed on the back cover page of this Prospectus.

Financial Highlights

The following table is intended to help you understand the Fund's financial performance for the past 5 years. Certain information reflects financial results for a single Fund share. Total returns represent the rate you would have earned (or lost) on an investment in the Fund (assuming reinvestment of all distributions). An independent registered public accounting firm has audited the information for each period. The information, along with the report of an independent registered public accounting firm and the Fund's financial statements, is also contained in the Fund's annual report, a copy of which is available upon request.

VT Opportunity Fund Commenced on May 8, 1992

For a share outstanding throughout each period

For the period ended:	Dec. 31, 2009	Dec. 31, 2008	Dec. 31, 2007	Dec. 31, 2006	Dec. 31, 2005
Net asset value, beginning of period	\$ 10.16	\$ 22.03	\$ 24.02	\$ 24.22	\$ 22.45
Income from investment operations:					
Net investment income (loss)	0.11	0.12	0.21	0.13	(0.02)
Net realized and unrealized gain (loss) on investments	<u>4.74</u>	<u>(7.30)</u>	<u>1.60</u>	<u>2.43</u>	<u>1.79</u>
Total from investment operations	<u>4.85</u>	<u>(7.18)</u>	<u>1.81</u>	<u>2.56</u>	<u>1.77</u>
Less distributions:					
Distributions from net investment income	0.00	(0.37)	(0.16)	0.00	0.00
Distributions from net realized gain	<u>0.00</u>	<u>(4.32)</u>	<u>(3.64)</u>	<u>(2.76)</u>	<u>0.00</u>
Total distributions	<u>0.00</u>	<u>(4.69)</u>	<u>(3.80)</u>	<u>(2.76)</u>	<u>0.00</u>
Net asset value, end of period	<u>\$ 15.01</u>	<u>\$ 10.16</u>	<u>\$ 22.03</u>	<u>\$ 24.02</u>	<u>\$ 24.22</u>
Total return¹	47.74%	(40.10)%	6.63%	12.22%	7.88%
Ratios/supplemental data:					
Net assets, end of period (000s)	\$154,782	\$378,197	\$779,286	\$897,047	\$1,004,763
Ratio of net investment income (loss) to average net assets ²	0.39%	0.47%	0.74%	0.48%	(0.06)%
Ratio of expenses to average net assets prior to waived fees and reimbursed expenses ^{2,3}	1.32%	1.21%	1.19%	1.18%	1.32%
Ratio of expenses to average net assets ^{2,3}	1.07%	1.07%	1.07%	1.07%	1.11%
Portfolio turnover rate ⁴	50%	70%	64%	41%	41%

¹ Total return calculations would have been lower had certain expenses not been waived or reimbursed during the periods shown.

² During each period, various fees and/or expenses were waived and/or reimbursed.

³ These ratios do not include expenses from the Underlying Funds.

⁴ Calculated on the basis of the Fund as a whole without distinguishing between the classes of shares issued.
